

Sweet Summertime

Mishka is a 8 year old female cat who was bought into the shelter January 2022 wrapped in a blanket and laying in a tiny shoe box. She was covered in fleas and very skinny. The good Samaritan who brought her in said she had been found as a stray walking around her apartment complex.

HSMC took sweet Mishka in and start treating her medical needs right away. After some much needed TLC, Mishka was put up for adoption and found her forever home with her new cat best friend Morrie who is now her sister.

Mowgli is a 12 year old male cat who has lived his whole life outside. When he was brought to HSMC he was covered in fleas and is still undergoing treatment for URI. He is the kindest boy, loves to cuddle. The staff knows once he is medically clear he will have no issue finding his forever home.

Kitten season is upon us. Female cats can start having babies as early as 5 months old. An average cat can have 1-8 kittens per litter and have 2-3 litters per year. One female cat and her offspring can produce between 100 and 400 cats in 7 years! Spaying and Neutering cats is very important as those statistics show.

McAllister is a seven month old male and was found as a stray on a farm. They think that he was dumped because he has vision issues, he is blind but can see shadows. Although he is blind, that doesn't slow him down at all! Many blind dogs map their usual landscapes their homes, their backyards, their usual walking paths. They scope out borders, trace with their noses and seem to calculate their movements. They record it all and then proceed just like any other dog.

Bibi is a three year old female dog, she was a transfer from another shelter so not much is known of her past. She is very high energy but has a lot of love to give. At the Humane Society we have been working with her by using hand signs and "touch training". All of the staff and volunteers hope we can soon find her a forever home.

Your donations make it possible to provide the medical care, food and shelter that these fur babies need.
